

TOWN OF BROOKLINE ■ MASSACHUSETTS

Brookline Green Electricity

Dear Basic Service Customer,

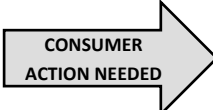

March 18, 2021

The town of Brookline approved a community electricity aggregation program, Brookline Green Electricity, authorizing our community to aggregate the electricity load (usage) of those residents and businesses that are on Basic Service with NSTAR Electric Company (Eversource). The goals of the Program are to provide you with competitive choice, longer-term price stability and more renewable energy options, however, future savings cannot be guaranteed because future Basic Service rates are not known.

You will be automatically enrolled in Brookline Green Electricity program unless you choose not to participate (opt out).

YOU MUST MAIL AND POSTMARK YOUR OPT-OUT CARD ON OR BEFORE APRIL 20, 2021 TO AVOID AUTOMATIC ENROLLMENT IN THE AGGREGATION PROGRAM.

After a competitive bid process, Direct Energy Services, LLC was selected as our Electricity Supplier for a contract starting on the January 2020 meter reading through the December 2022 meter reading. If you do not opt out of the Program, your participation will start on your May electricity meter reading. A comparison of the rates for the aggregation program and current rates for Eversource Basic Service are shown below.

Rates indicated above are for Supply Services only. Under the contract, the rate per kilowatt-hour (kWh) for electric supply will be fixed until your December 2022 meter reading. This Standard Product rate for Residential customers will remain below Eversource's Basic Service rate until Eversource Basic Service rates change on July 1, 2021 for Residential customers. The Standard Product rate for Small Commercial & Street Lighting customers is not below Eversource's current Basic Service rates. The Standard Product rate for Large Commercial customers is not below Eversource's current Basic Service rate. Program prices could increase as a result of a change in law that results in a direct material increase in costs during the term of the electric supply agreement.

There is no guarantee of savings. The primary intent of the Program is to provide price stability, more renewable energy, and savings over the duration of the 35-month term. However, future savings cannot be guaranteed because Eversource Basic Service rates change every six months for Residential and Small Commercial & Streetlighting customers, and every three months for Large Commercial customers. Thus, Eversource's Basic Service rates may be above or below the Program rate during any subsequent period.

AGGREGATION FEE for all Brookline programs is included in the above rates. The fee is \$0.001/kWh for the aggregation consultant. The town of Brookline does NOT receive any fees from the Program.
